

Classroom Quiz Adventure - Heider

Instructions

Project Goal

Build an **interactive quiz adventure game** where a student must survive a full school day by answering questions correctly.

You will go through:

1. Math Class
2. Science Class
3. History Class
4. Final Exam Boss

Correct answers give **points**.

Wrong answers reduce **energy**.

Your score will be saved to the **leaderboard**.

Setup Instructions

Create a folder: **classroom-quiz-adventure**

Inside the folder, create these files:

```
index.html
style.css
script.js
correct.mp3(downloaded file from mixkit.co or freesound.org )
wrong.mp3(downloaded file mixkit.co or freesound.org)
start.mp3(downloaded file mixkit.co or freesound.org)
```

You can download **free sound effects** from sites like:

- mixkit.co
- freesound.org

1. index.html

```
<!DOCTYPE html>
<html lang="en">
<head>
<meta charset="UTF-8">
<title>Classroom Quiz Adventure</title>
<link rel="stylesheet" href="style.css">
</head>
<body>

<h1>🏠 Classroom Quiz Adventure</h1>

<div class="game">

<div class="topbar">
Score: <span id="score">0</span>
Energy: <span id="energy">3</span>
Time: <span id="timer">10</span>
</div>

<div id="story"></div>

<div id="question"></div>

<div id="answers"></div>

<button id="startBtn">Start Game</button>

</div>

<div class="leaderboard">
<h2>🏆 Leaderboard</h2>
<ul id="leaderboardList"></ul>
</div>

<audio id="correctSound" src="correct.mp3"></audio>
<audio id="wrongSound" src="wrong.mp3"></audio>
<audio id="startSound" src="start.mp3"></audio>

<script src="script.js"></script>
</body>
</html>
```

2. style.css

```
body{
  font-family: Arial;
  background:linear-gradient(120deg,#4facfe,#00f2fe);
  text-align:center;
  margin:0;
  padding:0;
}

h1{
  color:white;
  margin-top:20px;
}

.game{
  background:white;

```

This project teaches important programming concepts:

- Structuring a webpage with **HTML**
- Styling layouts with **CSS**
- Using **JavaScript for interactivity**
- Creating **quiz logic**
- Updating the **DOM dynamically**
- Tracking **score and progress**

What Students learn:

- Conditional logic (**if**)
- Arrays and objects
- DOM manipulation
- Game progression
- Event handling
- Dynamic button creation
